than the Philippine Islands) in the form of raw cotton, unless the cotton reenters pursuant to Proclamation No. 2544 by the President of the United States, the exporter shall pay to the Corporation, in care of the New Orleans Office, as liquidated damages, the sum of 10 cents per pound with respect to each pound of such cotton (using 515 pounds as the weight of each bale for which such satisfactory evidence of exportation is not furnished within such period). In all such cases in which the gross unpatched weight of the cotton for which such satisfactory evidence of exportation is submitted within such period is less than the gross weight of the cotton purchased from the Corporation against such sale, the difference in weight shall be charged against another registered export sale or Declaration of Intent to Consign, or, if there is no such other sale or declaration against which the exporter would be entitled to purchase such quantity of cotton, the exporter shall pay to the Corporation, in care of the New Orleans Office, as liquidated damages, with respect to each pound of such quantity of cotton an amount equal to the export differential used in computing the price at which such quantity of cotton was purchased from the Corporation.

I. Section 295.12 (b) is amended to read:

(b) (1) Notwithstanding the provisions of § 295.10 (d) and paragraph (a) of this section, if the Director of the New Orleans Office determines that the exporter was or will be delayed in exporting cotton in fulfillment of an export sale and prevented from filing satisfactory evidence of exportation within the time specified in § 295.10 (d) by acts of government, acts of God, government embargoes or import restrictions, foreign exchange restrictions, strikes, warehouse congestion, lack of shipping space (claims of lack of shipping space must be supported by a letter from the War Shipping Administration, or from all of the steamship companies operating to the country to which the cotton is to be exported, showing that shipping space was unavailable for shipment of such cotton within the prescribed time), or other similar causes beyond the exporter's control, the Director of the New Orleans Office may grant an extension of the time within which such cotton may be exported and satisfactory evidence of exportation may be submitted.

(2) Notwithstanding the provisions of § 295.10 (d) and paragraph (a) of this section, if the Director of the New Orleans Office determines that part or all of the cotton covered by an export sale of which the New Orleans Office receives notice hereunder has not been exported in fulfillment of the export sale and that the export sale has been canceled because of death or bankruptcy or because of any other reason which, in the opinion of the Director of the New Orleans Office, is sufficient grounds, under the circumstances, for excusing the exporter from fulfilling his obligation hereunder to export such cotton, the exporter shall not be liable for the payment of 10 cents per pound liquidated damages with respect to the cotton he has not exported in fulfillment of the sale and the exporter shall have no rights hereunder with respect to the export sale of such cotton.

J. Section 295.16 is amended by adding "or such later date as may be approved by the Corporation" after "invoiced by the Corporation".

K. Section 295.19 is amended by inserting "number of bales and the estimated" before "number of pounds" and by substituting "a quantity of cotton equal to the number of pounds of cotton (gross unpatched weight) exported or to be exported in fulfillment of the declaration," for "an equal quantity of cotton,".

L. Section 295.19 (a) is amended by adding, at the end thereof, "The Corporation may, if it deems it desirable, approve amendments to declarations changing the country to which the cotton will be exported or the grade and staple length of the cotton."

M. Section 295.19 (b) is amended by inserting, after the first sentence thereof, "The weight of each bale of cotton listed on such declarations shall be taken to be 515 pounds, for the purposes of this paragraph."

N. Section 295.19 (f) (1) is amended to read:

(1) In all cases in which (i) the exporter fails to file with the New Orleans Office, within the time specified in § 295.10 (d) or such extension of time as may be granted under subparagraph (2) of this paragraph, satisfactory evidence that the number of bales of cotton listed on the declaration were exported in fulfillment of the declaration prior to July 1, 1947, and not later than 90 days after the date the declaration is approved, or (ii) cotton as to which such satisfactory evidence of exportation has been submitted within such period reenters the United States or its possessions (other than the Philippine Islands) in the form of raw cotton, unless the cotton reenters pursuant to Proclamation No. 2544 by the President of the United States, the exporter shall pay to the Corporation, in care of the New Orleans Office, as liquidated damages, the sum of 10 cents per pound with respect to each pound of such cotton (using 515 pounds as the weight of each bale for which such satisfactory evidence of exportation is not furnished within such period). In all such cases in which the gross unpatched weight of the cotton for which such satisfactory evidence of exportation is submitted within such period is less than the gross weight of the cotton purchased from the Corporation against such declaration, the difference in weight shall be charged against another declaration or registered export sale, or, if there is no such other declaration or sale against which the exporter would be entitled to purchase such quantity of cotton, the exporter shall pay to the Corporation, in care of the New Orleans Office, as liquidated damages, with respect to each pound of such quantity of cotton an amount equal to the export differential used in computing the price at which such quantity of cotton was purchased from the Corporation.

O. Section 295.19 (f) (2) is amended to read:

(2) (i) Notwithstanding the provisions of § 295.10 (d) and subparagraph (1) of this paragraph, if the Director of the New Orleans Office determines that the exporter was or will be delayed in exporting the cotton listed on the declaration by a cause listed in § 295.12 (b) (1), the Director of the New Orleans Office may grant an extension of the time within which such cotton may be exported and satisfactory proof of exportation may be submitted.

(ii) Notwithstanding the provisions of § 295.10 (d) and subparagraph (1) of this section, if the Director of the New Orleans Office determines that part or all of the cotton listed on the declaration has not been exported due to a cause listed in § 295.12 (b) (2), the exporter shall not be liable for the payment of 10 cents per pound liquidated damages with respect to the cotton he has not exported in fulfillment of the declaration and the exporter shall have no rights

hereunder with respect to such cotton under the declaration.

P. Section 295.24 is amended to read:

§ 295.24 *Effect of changes on contracts of sale.* Notwithstanding the provisions of § 295.25, if an exporter sells or contracts to sell lint cotton grown in the continental United States to a foreign purchaser for export to an approved country, and if approval of the country is withdrawn by the Secretary, the program is terminated, the export differential or the method of computing prices hereunder is changed, or this offer is amended, before the New Orleans Office receives notice of the export sale, such termination, change, or amendment shall not be applicable to Purchase Orders and vouchers submitted with respect to such export sale, provided the exporter (a) submits proof satisfactory to the Director of the New Orleans Office that the sale was made before the announcement of the termination, change, or amendment, and (b) registers the sale in accordance with the provisions of § 295.9 (a).

a. Check falling hair or relieve itching scalp beyond affording relief when such itching is not caused by a systemic or constitutional condition.

b. Preserve the wave in the hair; *Provided, however*, That this prohibition shall not be construed so as to prohibit the representation that the use of the preparation will not take the permanent or natural wave out of the hair.

c. Benefit the scalp after exposure to sun and wind beyond its soothing and lubricating effect.

d. Normalize excessive dryness or oiliness of the hair, prevent baldness, or help keep the hair in a normal condition.

e. Penetrate the hair or scalp.

It is the policy of the Solid Fuels Administration to authorize shipment on the U. S. Treasury Department's export program of surplus anthracite fines only when the person offering such anthracite for export has demonstrated to the satisfaction of SFAW that any anthracite so shipped shall be of a merchantable quality.

Any person who has or will have surplus anthracite fines (barley or smaller) available for export may submit an offer to the Solid Fuels Administration for War, Washington 25, D. The furnishing of any false or misleading information in connection with the submission of any offer, or the shipment of coal found not to be in substantial conformity with the representations made, may result in the immediate cancellation of any unfilled portions of the authorization, the rejection of the shipment before dumping into vessels, and the withholding of any future authorizations.

Any offer submitted will be given consideration only if it is accompanied by the following information:

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 1, Interpretation 2, as Amended July 2, 1946]

REGULARLY ESTABLISHED PRICES

The following amended interpretation is issued with respect to PR 1:

(a) *Acceptance of orders at regularly established prices.* (1) An order bearing a preference rating may not be rejected on the ground that the price is below the regularly established price, if the purchaser offers the OPA ceiling price, if any.

(2) Section 944.2 of Priorities Regulation 1 makes the acceptance of rated orders mandatory except in the several situations specified in the section. The only exception dealing with price is contained in paragraph (e) (1) which states that a rated order need not be accepted "if the person seeking to place the order is unwilling or unable to meet regularly established prices and terms of sale or payment."

(3) "Regularly established prices" cannot be higher than OPA ceiling prices, if any. They may, however, be lower. (Issued Mar. 18, 1944.)

(4) However, when no OPA ceiling price is applicable "a regularly established price" is the price the seller, when the rated order was received, is offering the material for sale to the class of purchasers to which the person who placed the rated order belongs and for delivery at the time the rated order requests. As explained in § 944.2, there can be no discrimination in price against a rated order, or between rated orders of different customers of the same general class.

(b) *Effect of increase in price after a rated order is accepted.* (1) In establishing new price levels, there must be no discrimination against rated orders, or between the rated orders of customers in the same class.

(2) If, after a rated order is accepted the seller's regularly established price increases as to all customers in the class to which the person who placed the rated order belongs, or if the OPA ceiling price, if any, is increased, the seller must still treat such order as a rated order if the purchaser is willing to meet the increased price.

(3) A seller must not remove the rated order from his shipping schedule until he has given the buyer adequate notice of his intention to do so and the buyer has had adequate time (in any case not less than seven days) to agree to the new price.

(4) This interpretation is not intended to affect any questions of liability of the seller for failure to deliver at the earlier price.

Issued this 2d day of July 1946.

FM BROADCASTING OTHER THAN NON-COMMERCIAL EDUCATIONAL BROADCAST SERVICE

ORDER ADOPTING PROPOSED AMENDMENTS

In the matter of promulgation of rules and regulations and Standards of Good Engineering Practice for FM Broadcasting other than Non-Commercial Educational Broadcast Service. Docket No. 6768.

At a session of the Federal Communications Commission held in its offices in Washington, D. C. on the 20th day of June 1946;

Whereas, the Commission on May 24, 1946 promulgated proposed amendments to the Commission's rules and regulations and Standards of Good Engineering Practice for FM Broadcasting other than Non-Commercial Educational Broadcast Service, and afforded interested persons an opportunity to submit by June 15, 1946 written statements with respect to these proposed changes; and

Whereas, no such statements have been filed by interested persons;

Now, therefore, it is ordered, That the proposed amendments to the Commission's rules and regulations and Standards of Good Engineering Practice for FM Broadcasting other than Non-Commercial Educational Broadcast Service as set forth in the Commission's order of May 24, 1946 are hereby adopted as final, with the following exceptions:

Section 3.204 (a) (2) is amended to read as follows:

2. In area II, class B stations will be licensed to operate with a service area equivalent[3] to a minimum of 2 kw effective radiated power and antenna height of 300 feet above average terrain and a normal maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.[4] The use of greater power and antenna height will be encouraged in those portions of Area II where such use would not result in undue interference to stations already authorized or to probable assignments insofar as can be determined at the time of the grant. In such case, the power, antenna height and area will be determined on the merits of each application, with particular attention being given to rural areas which would not otherwise receive service.

In addition section 1M of the Commission's Standards of Good Engineering Practice concerning FM Broadcast Stations is amended to read as follows:

M. Antenna height above average terrain. (1) For Class A stations the term "antenna height above average terrain" means the height of the radiation center of the antenna above the terrain 10 miles from the antenna.

(2) For Class B stations the term "antenna height above average terrain" means the height of the radiation center of the antenna above the terrain 2 to 10 miles from the antenna. (In general a different antenna height will be determined for each direction from the antenna. The average of these various heights is considered as the antenna height above average terrain for Class B stations.)

It is further ordered, That any outstanding FM construction permit or license which has heretofore been issued by the Commission for a community station shall be classified as a Class A station, and that all other FM construction permits and licenses which have been issued shall be classified as Class B stations.

[4] In the determination of appropriate coverage, consideration should be given to population distribution, terrain, service from other FM stations, trade area and other economic factors. INTERSTATE TELEGRAPH COMMUNICATION SERVICE

ORDER INSTITUTING INVESTIGATION

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 4th day of June 1946;

The Commission, having under consideration the matter of interstate telegraph communication service in the United States; and having also under consideration the record in Docket No. 6517, "In the matter of the application for merger of the Western Union Telegraph Company and Postal Telegraph, Inc.", and Docket No. 7445, "In the matter of the Western Union Telegraph Company petition for rate increase;"

It appearing, that in its supplemental application in Docket No. 6517, The Western Union Telegraph Company represented that a grant of its application for merger would serve public interest by facilitating improvements and economies in telegraph service and that after public hearing, such application was granted on September 27, 1943;

It further appearing, that upon petition of The Western Union Telegraph Company in Docket No. 7445, the Commission has this day concluded that it would allow the company to increase its domestic rates subject to the Commission's jurisdiction in an amount which on its estimates, will approximate more than $18,000,000 on an annual basis, as an emergency measure to afford the company the opportunity to continue and improve its operations;

It further appearing, that such increased rates provide no assurance that The Western Union Telegraph Company will now be able to furnish a rapid, efficient, nation-wide communication service with adequate facilities at reasonable charges, and that serious questions are presented as to the company's ability to continue in operation as a solvent enterprise, providing satisfactory service on a comprehensive nationwide basis, in the absence of some further relief;

It further appearing, that The Western Union Telegraph Company's program for improving its facilities and services by mechanization of its operations and otherwise has been subject to informal investgiation, and that such investigation should be formalized;

It is ordered, That an investigation be, and it is hereby instituted, on the Commission's own motion, into the practices, operations, regulations, facilities, services, patents, contracts, management, policies, and all activities, arrangements and plans of The Western Union Telegraph Company for or in connection with, or in any way affecting interstate telegraph communication service within the United States.

It is further ordered, That The Western Union Telegraph Company be, and it is hereby made party respondent herein;

It is further ordered, That, without in any way limiting the scope of the investigation, it shall include inquiry into the following specific matters:

1. The extent to which respondent's interstate communication service is required to meet public need for communication service.

2. The respondent's operating practices, the efficiency thereof, and the manner in which increased efficiency could be achieved.

3. The speed and reliability of respondent's interstate telegraph communication service, and the manner in which such speed and reliability can be improved.

4. The extent to which respondent provides a comprehensive nation-wide system for interstate telegraph communication service, investigations made and standards and policies followed by respondent in planning extensions and curtailments of its service, and the geographic scope of service which respondent should provide in order to meet public requirements for interstate telegraph communication service.

5. The extent and nature of complaints by the public with respect to respondent's interstate telegraph communication service, respondent's practices in dealing with such complaints, and the reasonableness of such practices.

6. Respondent's plans and programs for expanding and improving its service and reducing the cost thereof, the progress heretofore made in carrying out respondent's mechanization program, respondent's schedule for completing such program, and the specific benefits to respondent and to the public likely to result from such program.

7. The volume, type, and sources of interstate telegraph traffic which respondent may be expected to develop and handle in the future.

8. The relationship between such expected volume of traffic and respondent's plant capacity, and whether respondent will have sufficient traffic to make efficient and economic use of its proposed expanded plant capacity.

9. The ability of respondent, with expansion of facilities and reduction of rates, to handle greater volumes of traffic at a profit.

10. The basis upon which respondent formulates its policies with respect to developing its interstate telegraph communication service, the degree to which it makes or employs statistical, economic and other studies or investigations to determine public requirements for or public reactions to the service offered or proposed to be offered by it, and the nature, extent and reliability of such studies.

11. The functions and responsibilities of each of respondent's officers, the manner in which the management of respondent is conducted, and the efficiency of such management.

12. Respondent's patent structure and patent agreements, and the degree to which respondent avails itself of technical developments and improvements in telegraph communications, or may be barred from the use of such improvements by patent restrictions imposed by others.

13. The history and status of respondent's contracts and arrangements with railroads, the effect of such contracts on the expansion and improvement of respondent's interstate telegraph communication service, and respondent's specific plans with respect to the continuance of such contracts.

14. The status of respondent's contracts and arrangements with telephone carriers, the extent and nature of its reliance on the facilities of telephone carriers for the conduct of its operations, and its future plans with respect to such matters.

15. Respondent's contracts and arrangements for leasing the property of persons or corporations other than railroad or telephone carriers, and the effect thereof on its operations and financial status.

16. The extent and area of competition between respondent's interstate telegraph communication service, on the one hand, and interstate teletypewriter exchange, telephone and airmail services, on the other hand, the ability of respondent effectively to meet such competition, and the plans made and action taken by it to do so.

17. Respondent's capital structure, credit position and financial status and prospects and its ability to continue operations on a solvent basis.

18. Respondent's policies and practices with respect to its relation with its employees, and the effect of such policies and practices on its ability to render adequate interstate telegraph communication service in the public interest.

19. The steps to be taken to improve respondent's operations and strengthen its financial position so as to provide the people of the United States with rapid, efficient, interstate telegraph communication service on a comprehensive nation-wide basis, with adequate facilities at reasonable charges.

20. The steps to be taken to provide such service as described in paragraph (19) above in the event of respondent's insolvency, and whether governmental assistance or intervention in any form will be necessary to assure a continuation of interstate telegraph communication service.

It is further ordered, That hearings in this proceeding shall be held at such time as may hereafter be fixed by the Commission.

By the Commission.

A. M. STATION WBLK[1]

PUBLIC NOTICE CONCERNING PROPOSED ASSIGNMENT OF LICENSE

The Commission hereby gives notice that on May 23, 1946, there was received an application (B2-AL-542) for consent under section 310 (b) of the Communications Act (47 U.S.C.A. 310) to the proposed assignment of the license of AM Station WBLK, Clarksburg, West Virginia from Charleston Broadcasting Company to News Publishing Company, 1500 Main Street, Wheeling, West Virginia.

On March 30, 1946 the parties contracted for the assignment of the license of WBLK and for the sale of all the physical assets, contracts and transcription services used exclusively in connection with operating the station, in consideration of $177,500 payable in cash upon approval of the Commission. Further details concerning the application and negotiations between the parties may be found with the application and papers on file at the offices of the Commission.

In the Commission's decision of September 6, 1945, granting the application for transfer of control of the Crosley Corporation (Docket No. 6767), it was announced that public hearings would be held to consider new rules and regulations for the handling of assignment and transfer applications including provision for public notice by the applicant and by the Commission of the filing of such applications and pertinent details in cases where a controlling interest is involved. Thereafter, on October 3, 1945, the Commission also gave public notice (10 F.R. 12926) that pending the issuance of such proposed rules, hearing thereon, and final adoption, consideration of such applications would be deferred unless applicants desired to follow the procedure proposed in the Crosley decision and supplement their applications so as to come within the framework of the announced procedure, including the provision for public notice. Subsequently, on December 13, 1945, the Commission adopted tentatively a proposed rule of procedure to govern the handling of assignment and transfer applications including the character of notice required of applicants in such cases. Pursuant thereto, the Commission was advised on June 20, 1946 that beginning on May 22, 1946 notice of the proposed assignment was published in a newspaper of general circulation in Clarksburg, West Virginia.

In accordance with the procedure proposed in the Crosley decision and that announced in the Commission's release, no action will be had in the instant application for a period of 60 days from June 20, 1946, within which time other persons desiring to apply for the facilities involved may do so upon the same terms and conditions as set forth in the above-described contract.

DELTA BROADCASTING CO. (STATION WDBC)[1]

PUBLIC NOTICE CONCERNING PROPOSED TRANSFER OF CONTROL

The Commission hereby gives notice that on June 24, 1946, there was filed with it an application (B2-TC-499) for its consent under section 310 (b) of the Communications Act (47 USCA 310) to the proposed transfer of control of Delta Broadcasting Company (licensee of standard broadcast station WDBC, Escanaba, Mich.) from Gordon H. Brozek, Frank J. Russell, Jr., and Leo G. Brott to Frank J. Lindenthal, J. P. Norton, and William J. Duchaine, 331 South 9th Street, Escanaba, Mich. The proposed transfer of control of the above license, is based on an agreement entered into June 3, 1946, between the above indicated parties pursuant to which the first three parties named above agree to sell to the latter three all of their 134 shares of stock of Delta Broadcasting Company, constituting all the issued and outstanding stock of said company, for a consideration of $39,999, plus an amount equal to all the cash on hand and accounts receivable of the company at the time of the transfer.

[1] Section 1.364, Part 1, Rules of Practice and Procedure.

Sellers agree to assume all the bills payable at that time. Upon execution of the agreement, purchasers paid $5,000 in earnest and the balance of the purchase price is to be paid within two weeks after Commission consent, when purchasers will assume control over the company. Further information as to the arrangements, and pertaining to the application, may be determined upon examination of the papers on file at the offices of the Commission.

In the Commission's decision of September 6, 1945, granting the application for transfer of control of the Crosley Corporation (Docket 6767), it was announced that public hearings would be held to consider proposed new rules and regulations for the handling of assignment and transfer applications including provision for public notice by the applicant and the Commission of the filing of such applications and pertinent details in cases where a controlling interest is involved. Thereafter, on October 3, 1945, the Commission also gave public notice (10 FR 12926) that pending the issuance of such proposed new rules, hearing thereon, and final adoption, consideration of such applications would be deferred unless applicants desired to follow the procedure proposed in the Crosley decision, and supplement their applications so as to come within the framework of the announced procedure, including the provision for public notice. Pursuant thereto, the Commission was advised on June 24, 1946 that notice of the filing of the application was inserted in the Escanaba Daily Press, Escanaba, Mich., a newspaper of general circulation in that area, beginning June 13, 1946.

In accordance with the procedure proposed in the Crosley decision and that announced in the Commission's release, no action will be had upon the WDBC application for a period of 60 days from June 13, 1946, within which time other persons desiring to apply for the facilities involved may do so upon the same terms and conditions as set forth in the above-described contract.

WAIVERS OF HEARING

NOTICE OF PROCEDURE

JUNE 21, 1946.

Because of the increasing number of broadcast applications which are being designated for hearing and are being added to an already over-crowded hearing docket, the Commission has adopted a temporary procedure which may obviate hearings in many broadcast cases and make possible a considerably more expeditious disposition of applications than is now possible.

In the case of any applications which are designated in the future for hearing, or of any applications which have already been designated for hearing but no hearing has yet been held, the parties may request the Commission to waive a hearing and to grant or deny the applications upon the basis of the information contained in the applications and other papers on file with the Commission pertaining to the applicants or applications. Any party desiring to waive a hearing in accordance with this procedure should execute and file with the Commission a waiver on the form attached and serve copies on all other parties or a joint waiver may be signed by all the parties. Upon the receipt of waivers from all the parties to a proceeding, the Commission will decide whether the case is an appropriate one for determination without a hearing. If it is determined by the Commission that notwithstanding the waiver, a hearing is necessary, the case will be continued on the hearing docket. If the Commission concludes that the case can appropriately be decided without a hearing, the case will be removed from the hearing docket.

In all cases which are removed from the hearing docket in accordance with this procedure, the Commission will be free to proceed to decide the case upon the basis of the information contained in the applications and in any other papers on file with the Commission which pertain to the applicants or applications in question, including any protests filed at any time prior to final decision. The Commission reserves the right to call upon any party to furnish any additional information which the Commission deems necessary to a proper decision. Such information shall be served upon opposing parties.

This procedure does not in any way change the Commission's practice with respect to protests. Any party, or any member of the public, may still file with the Commission any information concerning an applicant which bears upon his qualifications to operate a station in the public interest. Where such protest raises a question of substance which might affect the granting of the application a hearing will generally be required. If the protest is not of any substance the Commission may proceed to act upon the application without hearing.

In all cases where the Commission issues a final decision pursuant to this procedure without holding a hearing a brief memorandum opinion will be issued by the Commission stating its reasons for its grant or denial of the individual applications. This decision shall have the same effect as a final decision under the Commission's Rules and Regulations. Petitions for rehearing may be filed with respect to such decision. Such petition will be granted only upon a showing that the Commission has made an erroneous determination on a relevant and material issue of fact or law or that relevant and material evidence has been newly discovered which could not have been discovered at an earlier date with the exercise of due diligence.

The Commission does not construe this procedure as involving any waiver by the parties of the right to appeal to the Courts from any adverse final decision of the Commission.

The undersigned hereby waives its (their) right to a hearing in the above-entitled docket case and in all other docket cases which have been consolidated for hearing with such case and requests the Commission to decide said case or cases upon the basis of the information contained in the applications and in any other papers on file with the Commission pertaining to the applicants or applications in question. It is expressly understood that the Commission may render a final decision based upon such information or such additional information as the Commission may request from any party at any time before such decision; that such decision shall have the same force and effect as though made after a hearing; and that any petition for rehearing filed with respect to such decision will be granted only upon a showing that the Commission has made an erroneous determination on a relevant and material issue of fact or law or that relevant and material evidence has been newly discovered which could not have been discovered at an earlier date with the exercise of due diligence.

FEDERAL POWER COMMISSION.

[Docket No. G-736]

UNITED FUEL GAS CO.

NOTICE OF APPLICATION

JULY 1, 1946.

Notice is hereby given that on June 13, 1946, United Fuel Gas Company, a West Virginia corporation having its principal place of business at Charleston, West Virginia, filed with the Federal Power Commission an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, to authorize the construction and operation of certain facilities hereinafter described for the transportation and sale of natural gas to the Pittsburgh Group of Columbia Gas & Electric Corporation system, of which The Manufacturers Light and Heat Company is the principal member, for resale and distribution for ultimate public consumption.

The proposed facilities are to be constructed and operated in connection with said sale and delivery of natural gas to the Pittsburgh Group of the Columbia Gas & Electric Corporation system and consist of approximately 49 miles of 16-inch main transmission line as follows:

1. 28 miles of 16-inch main transmission line to parallel and loop sections of Applicant's existing main transmission lines T and TM3 between Applicant's Cobb Compressor Station located in Kanawha County, West Virginia, and Applicant's Carnegie Compressor Station, in Wetzel County, West Virginia.

2. 21 miles of 16-inch main transmission line extending from a point on Ap-

plicant's main transmission line TM3, near Carnegie Compressor Station, located in Wetzel County, West Virginia, to a point on the West Virginia-Pennsylvania state line approximately 8 miles northeast of Hundred, West Virginia, where it will connect with the proposed line of the Manufacturers Light and Heat Company.

The Applicant submits that the proposed construction will augment capacity of existing facilities by 30,000 mcf per day, making a total maximum daily transmission line capacity of 110,000 mcf available for deliveries from the Charleston Group of which Applicant is a member, to the Pittsburgh Group of which The Manufacturers Light and Heat Company is the principal member. The maximum daily transmission-line capacity for deliveries from the Charleston Group with existing facilities is 80,000 mcf. The Pittsburgh Group's estimate of maximum daily requirements from the Charleston Group for 1947 is 110,000 mcf, or 30,000 mcf per day above the maximum capacity of existing facilities.

The application states that the proposed lines will be operated at 350 psi line pressure at Cobb Compressor Station, Kanawha County, West Virginia, and 211 psi at Carnegie Compressor Station, Wetzel County, West Virginia, and will augment capacity of existing facilities by 30,000 mcf per day.

The application further states that gas reserves to supply the market proposed to be served will be from those of the Charleston Group, of the Columbia Gas and Electric system as augmented by a contract between United Fuel Gas Company and the Tennessee Gas and Transmission Company, dated February 14, 1946, to supply the Charleston Group with a firm delivery up to 200,000 mcf per day for the period ending January 1, 1965.

The total cost of the proposed facilities as estimated by Applicant will approximate $1,400,000.

Any interested State Commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of Part 67 of the provisional rules of practice and regulations under the Natural Gas Act, as amended, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

Any person desiring to be heard or to make any protest with reference to the application of the United Fuel Gas Company should file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of this publication, a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

[Docket No. G-737]

MANUFACTURERS LIGHT AND HEAT CO.

NOTICE OF APPLICATION

JULY 1, 1946.

Notice is hereby given that on June 13, 1946, The Manufacturers Light and Heat Company, a Pennsylvania corporation maintaining a principal place of business at 800 Union Trust Building, Pittsburgh 19, Pennsylvania, and authorized to do business in Pennsylvania, Ohio and West Virginia, filed with the Federal Power Commission an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, to authorize the construction and operation of certain facilities hereinafter described, and to make certain changes in existing facilities for the transportation and sale of natural gas in interstate commerce for resale for the purpose of improving delivery of gas through its main transmission system.

The proposed additional facilities and changes in existing facilities consist of the following:

1. 76 miles of 20-inch O. D. loop transmission line from a point on the West Virginia-Pennsylvania state line in Gilmore Township, Greene County, Pennsylvania, extending northeasterly to Applicant's Waynesburg, Compressor Station located at Waynesburg, Greene County, Pennsylvania, then in a northerly direction via Washington and Canonsburg, Pennsylvania, to an intersecting point on an existing 16-inch line of the Applicant adjacent to the Borough of Rochester, Beaver County, Pennsylvania, with cross-connections to existing pipe lines of the Applicant at various points where the 20-inch line crosses the same. At a point in Allegheny County, Pennsylvania, where the proposed line crosses the Ohio River, a multiple river crossing equivalent to the 20-inch line in capacity will be installed.

2. Replace the existing 375-pound maximum working pressure compressor cylinders on one of the two 1,250-horsepower units installed at Majorsville Compressor Station, with two 500-pound maximum working pressure compressor cylinders, and replace certain pipe, valves and fittings in the Majorsville Compressor Yard, with high pressure valves and fittings.

3. Install an additional 600-horsepower gas-driven compressor at Applicant's existing 1200-horsepower Donegal Compressor Station in Donegal Township, Washington County, Pennsylvania; enlarge the compressor station buildings; install a glycol dehydration plant; replace the 850-pound maximum working pressure compressor cylinders on an existing 600-horsepower gas engine with 1,000-pound compressor cylinders; and replace an existing 500-pound maximum working pressure storage measuring station with a 1000-pound working pressure measuring station.

4. Replace 1.7 miles of 6-inch line between Donegal Compressor Station and Applicant's 16-inch and 20-inch main transmission lines with 1.7 miles of 12-inch solid welded line.

The Applicant submits that it proposes, through the means of these facilities, to improve and increase the deliverability of its main transmission system in the interest of flexibility of operation, continuity and adequacy of facilities in order to provide as nearly as possible, and in the most feasible and economical manner, continuous service to existing customers, and, for a reasonable period in the future, to provide for the normal growth of the Applicant company and its associated companies of the Pittsburgh Group of the Columbia Gas & Electric Corporation system only within the area served by the Applicant and associated companies.

The proposed installation will provide additional pipeline facilities capable of handling, under proposed peak day operating conditions, 40,000,000 cubic feet of gas per day, of which 20,000,000 cubic feet will be received from United Fuel Gas Company and 20,000,000 cubic feet will be transferred from Applicant's present 16-inch and 20-inch main transmission lines thus relieving the load in such lines and making possible greater deliverability into said existing lines from the Donegal and Majorsville Storage Fields on such peak days. On off periods this will permit the storage of additional gas in the Majorsville, Donegal and Brinker Storage Fields.

With the proposed changes at Majorsville Compressor Station it will be possible to have in storage in Majorsville Storage Field on February 1, 1950, 8,677,000,000 cubic feet, with an estimated daily deliverability of 15,200,000 cubic feet at that time, as compared with the estimated daily deliverability as of February 1, 1946, of 9,600,000 cubic feet. Through the proposed changes and additions at Donegal Compressor Station, it will be possible to have storage in Donegal Storage Field on February 1, 1950 of 3,935,000,000 cubic feet, with an estimated daily deliverability of 41,000,000 cubic feet at the time, as compared with an estimated daily deliverability on February 1, 1946 of 19,600,000 cubic feet.

The application states that the estimated requirement of the applicant and its associate companies of the Pittsburgh Group, on a winter peak day in 1947 (including requirements of the companies of the former Binghamton Group) are 309,700,000 cubic feet, and the estimated requirements of the applicant and its associate companies of the Pittsburgh Group for 1950 on a winter peak day total 331,800,000 cubic feet. The winter peak day capacity of applicant's existing transmission facilities is approximately 282,000,000 cubic feet, thus indicating that without the proposed facilities a deficiency exists in applicant's transmission capacity on a winter peak day of 27,700,000 cubic feet for the year 1947, and 49,800,000 cubic feet for 1950.

The total estimated gross cost of all the above mentioned projects is $2,950,030, less estimated salvage of $17,631, or an estimated net cost of $2,932,399.

Any interested State Commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of Part 67 of the provisional rules of practice and regulations under the

Natural Gas Act, as amended, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

Any person desiring to be heard or to make any protest with reference to the application of The Manufacturers Light and Heat Company should file with the Federal Power Commission, Washington, D. C., not later than 15 days from the date of this publication, a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.
